REPORT TITLE
Disposal Site Remaining Volume Report 02/10/09/205

RECOMMENDATION: That council receive the attached for information.

BACKGROUND/EXECUTIVE SUMMARY: As requested at the previous meeting here are the current estimates of remaining capacity for the Bissett Creek and Stonecliffe disposal sites based on reports sent for audit purposes in spring 2009. A complete physical survey has not been completed in some time.

I have contacted Kevin Mooder and he has arranged for Perry Laroche to complete a field survey some time this week. Kevin will then attend at a near future council meeting to discuss findings and options.

Bissett Creek Site (last surveyed in 2007)

- Based on the May 2008 field survey
- Volume as of December 31, 2008 – 8,500m<sup>3</sup>
- Approved Site Capacity – 18,443 m<sup>3</sup>
- Estimated site life – 8 years assuming that fill rate remains constant at 1,175 m<sup>3</sup>/year

Stonecliffe Site (last surveyed over 5 years ago)

- Estimated without field survey
- Landfilled volume as of December 31, 2008 – 16,000 m<sup>3</sup>
- Total Site Capacity – 26,680 m<sup>3</sup>
- Estimated site life – 17 years assuming fill rate remains constant (Historical fill rate of 600 m<sup>3</sup>/year)

Financial Considerations/Budget Impact: Cost will be \$1500 - \$1750 per site and may be deferred to 2010 should our remaining budget not allow for it. Costs of completing the surveys can be included in 2009 environmental study and monitoring accounts.

Approved and Recommended by the Clerk

Melinda Reith,  
Municipal Clerk
