

HCM Stakeholder Consultation Discussion Answers

1. I see the rail trail as a multi-use trail including snowmobiles and Atvs throughout the entire Municipality with no exceptions.
2. I think development should be left to private individuals and business people
3. I think the Municipal corporation should stay out of what should be business left to private enterprise.
4. I have no concerns with private development along the trail, either personally, for the community, or for residents along the trail. I believe that Council will ensure that developments fall within accepted usage.
5. I have some concerns with negative effects, not for me personally but for the community and residents along the trail. Having said that, I believe they will be dealt with by county, by the MLSC, and by whatever develops as an ATV association.
