

NOTICE OF CONSTRUCTION WORKS
Design-Build Project DB 2018-4013
REPLACEMENT OF HIGHWAY 17 CULVERT AT BARBUT CREEK (WP 4005-13-01)

THE PROJECT

The **Ministry of Transportation (MTO)** has retained **Looby Construction Limited** to undertake the Detail Design and Construction for the replacement of the Barbut Creek Culvert (WP 4005-13-01) on Highway 17, 6.0 km west of Deux-Rivieres, westerly, for approximately 0.7 km (see map). The project area is in the United Townships of Head, Clara & Maria, in Renfrew County.

THE PROCESS

This project is being carried out in accordance with the approved environmental planning process for Group "C" projects under MTO's Class Environmental Assessment for Provincial Transportation Facilities (2000). The preliminary design phase was documented in an Environmental Screening Document (ESD) which has been updated to reflect detailed design.

CONSTRUCTION WORKS AND TRAFFIC STAGING

The purpose of this notice is to inform interested stakeholders that Construction Works are to take place starting in spring 2020 to replace the culvert. Traffic staging on Highway 17 is required for the construction of the new culvert. The work will occur in three stages over a single construction season (April to November) and will maintain one-lane, two-way traffic on a temporary modular bridge along a temporarily shifted alignment for the full duration of the culvert replacement construction. The minimum lane width through the work zone during construction will be 3.5 m, with 0.5 m shoulders on each side. Lane and shoulder widths will be maintained as existing beyond the work zone.
