Report 21/02/19/1202 – Northern Graphite – Unopened Road Allowance

Resolution No.:25/04/19/006

Moved by Councillor Villeneuve and Seconded by Councillor Allen

WHEREAS Northern Graphite requested to purchase portions of unopened road allowances that are required to proceed with establishing the Bissett Creek Graphite Mine;

AND WHEREAS Council sees the potential economic benefit resulting from the graphite mine operations;

THEREFORE BE IT RESOLVED THAT the Council of the United Townships of Head, Clara and Maria does hereby grant Northern Graphite the option to purchase the requested unopened road allowances for the sum of \$50,000 at any time for the next three years.

An agreement will be executed with details as follows:

Northern will pay a non-refundable deposit of \$10,000 when council approves the option agreement and it is executed;

Northern will pay \$40,000 when it exercises the option agreement and acquires the land; and

The Township will have the option to reacquire the land at the end of the mine life for \$1 if it so chooses.

Defeated

Carried Unanimously

MAYOR

CLERK

Brian Leahey – County of Renfrew of Paramedics

The Heli-pad came about because of the recognition that an unused piece of asphalt was available in HCM and was suitable because it needed little repair.

With response times as they were, ORNGE assessed our landing zone; trees and cables were removed. Because we are a remote small community, it is very unique to have helipad in a community this size. Not a large drain in coffers for the services it may provide.

Doesn't it take just as long to drive to Deep River or Mattawa? If helicopter lands here it is transporting to Ottawa, not Deep River or North Bay. Patients transported from our landing will be in Ottawa within 40 minutes; huge value in that.

You hope that the Heli-pad doesn't need to be used, but invaluable if it does. One life saved is worth the cost.

In the past when ORNGE was required to come, they have landed at the scene, never used the helipad. Whenever there is an incident on highway or forest they will land there if it is in the day and is safe to do so. The Heli-pad is a safety net for air ambulance if cannot land safely at the scene. It is based on operational requirements at the time of landing.

How 911 works – when someone places a call it goes to North Bay; central reporting bureau. The caller will automatically be transferred to dispatch in Renfrew who will then dispatch the closest responding paramedic. When a request is made for ORNGE it comes from dispatch in Renfrew. Refusals occur mostly when a patient is stabilized in hospital setting; on scene calls are rarely questioned.

Cost to residents: Inter facility transfers are cost neutral. For example a transfer from Deep River hospital to Pembroke hospital is \$0. A transfer from the scene of an accident is charged a co-payment fee of \$45 which is billed by the receiving facility. A portion goes to the hospital and the other portion to the ministry.

When there is a medical emergency and a call to 911 is placed, land ambulance is dispatched immediately, circumstances of the call are reviewed, and dispatch will tier ORNGE if they determine necessary even before land ambulance arrives on scene.

Landing in this area is visual; during the night and storm conditions, helicopters cannot land - only Pembroke airport.

For a Heli-pad to be certified, one flight approach must be established. The same approach is used coming in and out. If there are trees in that path, they need to be removed.

Can a helicopter come in another path if conditions are not good for the approved approach? Once the approved approach path has been established it is signed off with the ministry and is what must be complied to.

Why wouldn't we change it? The township would need to pursue this with ORNGE.

Need to consider prevailing winds, rising/lowering terrain. ORNGE has an instrument that does 360 reading to determine the most appropriate approach path to be approved by ministry.

Brian will be happy to meet with ORNGE rep when he is here in May, and he can speak with them before they arrive if Council wishes.

HCM and Deep River are not suitable for IVR, only VFR.. Brian would encourage the landing here.

Pilot would really try to avoid night landing off of an airport – i.e. on the highway. Even if it's a short ride to the pad, would rather land on pad as there is lighting in place. Circumstances must be very clean regarding safety, to land off of the pad at night.
